Hazardous Weather

High Wind Warning

Through 10 am MDT this morning

Weather Forecast Office
Midland/Odessa TX
Issued April 22, 2017 4:22 AM CT

High Winds through Guadalupe Pass.

+ Winds...Northeast 35-45 mph
+ Gusts... Around 60 mph

+ Winds could make for difficult driving conditions.

+ Motorists driving high profile vehicles such as campers, vans and tractor trailers should exercise caution.

f t @ NWSMidland

weather.gov/maf

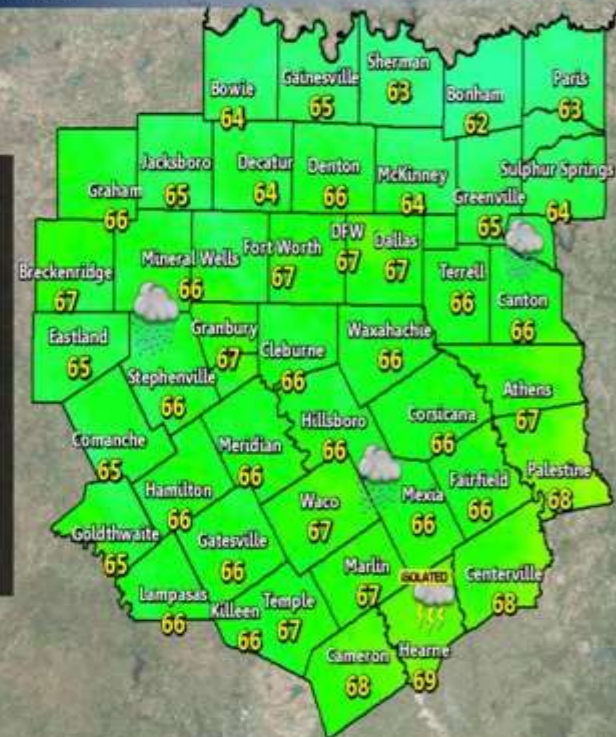

A High Wind Warning is in effect this morning through Guadalupe Pass. Northeasterly winds of around 35 to 45 mph will gust to around 60 mph. Use caution if driving through this area this morning!

Cooler & Blustery Saturday

National Weather Service Fort Worth

- It will be a much cooler day today in the wake of a cold front.
- A few showers and perhaps a storm or two will be possible through the noon.
- North winds of 15 to 20 MPH with gusts to near 30 MPH are possible.

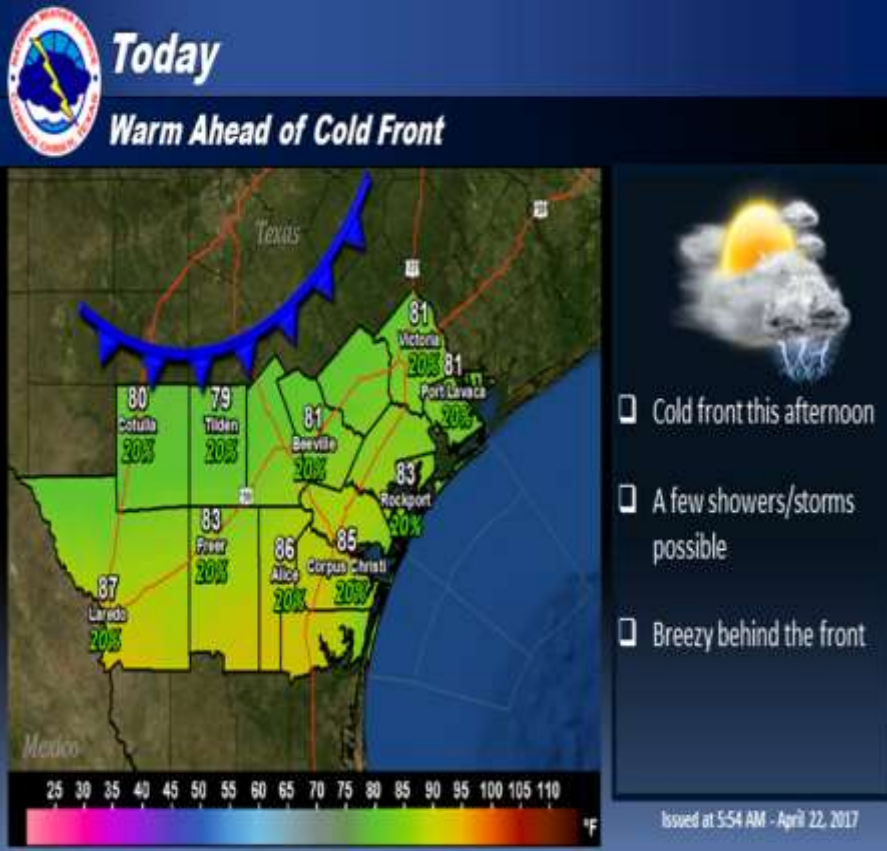

f t @ NWSFortWorth
weather.gov/FortWorth

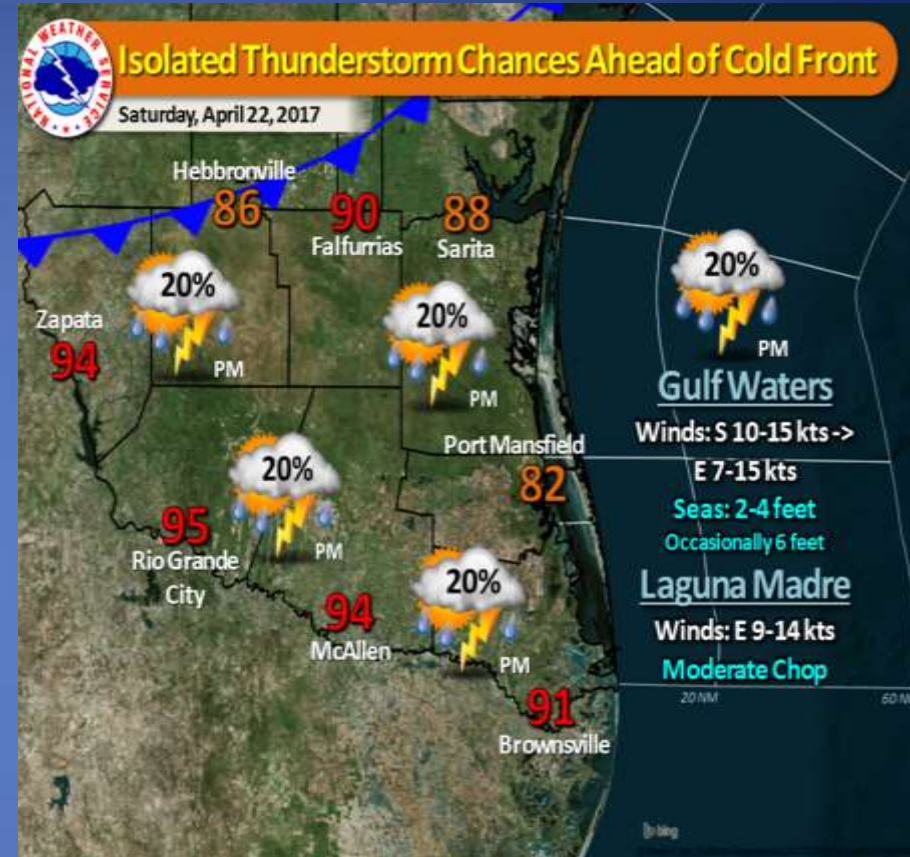

510 AM CDT
Sat Apr 22 2017
National Weather Service
Fort Worth, TX

Cooler and Blustery conditions are expected for much of North and Central TX. Through noon, there will be a risk for showers and perhaps a thunderstorm or two. Temperatures will only climb into the 60s with a stiff north wind. Speeds of 15 to 20 MPH with gusts to near 30 MPH will be possible.

Hazardous Weather

Another warm day is in store before a cold front moves through later this afternoon. Expect highs mainly in the 80s area wide. A few showers or storms are possible with this front.

Mostly clear skies will trend this morning across Deep South Texas before skies become partly cloudy with an isolated chance for showers and thunderstorms this afternoon in advance of the arrival of a late season cold front. Temperatures will be hot across the region ahead of the front with highs in the upper 80s to middle 90s. Modest breezes will trend across the coastal waters today with a moderate chop on the bay and gulf seas of 2 to 4 feet. Conditions on the waters will become hazardous tonight behind the front's passage with building gulf seas and increased roughness across the bay.
